

## The 2007 Report of Top Doctorate\* Degree Producing Colleges and Universities

Below are the data charts that capture the top Midwest\*\* colleges and universities that graduated the largest number of American racial minority students (for doctorates) in 2005-06 as reported in the July 12, 2007 issue of *Black Issues in Higher Education* (BIHE).

The data can be useful in planning recruitment strategies for many mid-level and select senior-level administrative positions at our member schools as well as for some adjunct teaching positions. Additionally, many MA holders will be excellent candidates for a second graduate degree or an initial professional degree. Therefore these charts can assist graduate and professional school admission offices as they put together Fall 2007 recruitment schedules for their next class.

By providing this data on local Midwest schools, it is hoped our member schools will maximize diversity recruitment efforts for senior staff employees, tenure-track and adjunct faculty of color and experience a cost savings in the process.

Additionally, because some reporting schools provided combined school data for the annual report to BIHE, MPCC will consider compiling our collective MA graduation data from IPEDS and submit a combined report to BIHE. CI contends that, over time, our combined statistics would likely place MPCC among top BA producers in the Midwest. At a minimum, we will be able to strategically share the stats widely with all appropriate audiences.

A similar report of undergraduate and master's degree producers was produced.

\* includes Ph.D., Ed. D., Psy.D., DBA, DSN, etc. NOT first professional degrees (e.g. law, medicine, dentistry divinity, etc.)

\*\* includes MN, WI, MI, IA, ND, SD, NE, OH, KS, MO, CO, IL and IN

## Background and legend

This edition of the Top 100 analysis considers degree awarded during the 2004-05 academic year. The data come from the U.S. Department of Education's National Center for Education Statistics (NCES) Integrated Postsecondary Education Data Set (IPEDS).

The Data for this study are collected by NCES through the IPEDS program Completer's Survey. Specifically this Survey asks for the number of degrees and other formal awards conferred in academic, vocational and continuing professional education programs. NCES uses the Classification of Instructional Program (CIP) codes which provide a common set of categories from which institutions can report their data, allowing comparisons across all colleges and universities.

The lists included in this analysis are based on the students' racial or ethnic status. Students self-report this information during their college career by choosing among a set of categories. Only U.S. citizens or permanent residents are included in the minority categories – Blacks, non-Hispanic; American Indian or Alaskan Native; Asian or Pacific Islander; and Hispanic.

The lists presented in the this issue array the Top 100 degree-granting institutions for each minority group overall, and the Top 50 institutions that conferred degrees within specific disciplinary areas. Within each list, we present the total number of degrees conferred by the institution for the prior year (2004-05), followed by the count for the current year (2005-06) for men, women and then total. The counts are followed by two percentages. The first one shows how the number of degrees conferred to that particular racial/ethnic group stands in the proportion to all degrees conferred at the institution (across all disciplines for the Top 100 lists and within each discipline for the Top 50 discipline lists). The second percentage column represents the percentage change in total degrees between the prior and the current year.

*Data is provided by the Community Initiative of  
Minnesota Private College Council, Fund, and Research Foundation  
Staff: Phillip W. Miner  
Director of Community Initiative (CI)*
